

**Appendix C to § 1910.1200—Allocation of Label Elements (Mandatory)**

- C.1** The label for each hazardous chemical shall include the product identifier used on the safety data sheet
- C.1.1** The labels on shipped containers shall also include the name, address, and telephone number of the manufacturer, importer, or responsible party.
- C.2** The label for each hazardous chemical that is classified shall include the signal word, hazard statement(s), pictogram(s), and precautionary statement(s) specified in C.4 for each hazard class and associated hazard category, except as provided for in C.2.1 through C.2.4.
- C.2.1 Precedence of Hazard Information**
- C.2.1.1** If the signal word “Danger” is included, the signal word “Warning” shall not appear;
- C.2.1.2** If the skull and crossbones pictogram is included, the exclamation mark pictogram shall not appear where it is used for acute toxicity;
- C.2.1.3** If the corrosive pictogram is included, the exclamation mark pictogram shall not appear where it is used for skin or eye irritation;
- C.2.1.4** If the health hazard pictogram is included for respiratory sensitization, the exclamation mark pictogram shall not appear where it is used for skin sensitization or for skin or eye irritation.

**C.2.2 Hazard Statement Text**

**C.2.2.1** The text of all applicable hazard statements shall appear on the label, except as otherwise specified. The information in italics shall be included as part of the hazard statement as provided. For example: “causes damage to organs (state all organs affected) through prolonged or repeated exposure (state route of exposure if no other routes of exposure cause the hazard)”. Hazard statements may be combined where appropriate to reduce the information on the label and improve readability, as long as all of the hazards are conveyed as required.

**C.2.2.2** If the chemical manufacturer, importer, or responsible party can demonstrate that all or part of the hazard statement is inappropriate to a specific substance or mixture, the corresponding statement may be omitted from the label.

**C.2.3 Pictograms**

**C.2.3.1** Pictograms shall be in the shape of a square set at a point and shall include a black hazard symbol on a white background with a red frame sufficiently wide to be clearly visible. A square red frame set at a point without a hazard symbol is not a pictogram and is not permitted on the label.

**C.2.3.2** One of eight standard hazard symbols shall be used in each pictogram. The eight hazard symbols are depicted in Figure C.1. A pictogram using the exclamation mark symbol is presented in Figure C.2, for the purpose of illustration.

**Figure C.1—Hazard Symbols and Classes**

Flame	Flame Over Circle	Exclamation Mark	Exploding Bomb
 <p>Flammables Self Reactives Pyrophorics Self-heating Emits Flammable Gas Organic Peroxides</p>	 <p>Oxidizers</p>	 <p>Irritant Dermal Sensitizer Acute Toxicity (harmful) Narcotic Effects Respiratory Tract Irritation</p>	 <p>Explosives Self Reactives Organic Peroxides</p>
